Full job description

OUR PRACTICE:

Major Surgical & Vein Clinic is a growing medical practice specializing in venous disease and general surgical conditions. We are committed to providing high-quality, patient-centered care while fostering a professional, team-oriented work environment. Our greatest asset is our exceptional team, and we are seeking a motivated Registered Vascular Technologist (RVT) to grow with our practice.

Registered Vascular Technologist

JOB SUMMARY: The Registered Vascular Technologist performs noninvasive diagnostic ultrasound examinations of the extracranial, peripheral, and visceral vascular systems in accordance with established laboratory protocols. This role is responsible for acquiring accurate diagnostic data for interpretation by the reading physician.

The primary focus of this position includes venous insufficiency evaluations, deep venous testing (including iliac and pelvic vein assessments), and assistance with peripheral venous procedures. Responsibilities also include the performance of a comprehensive range of noninvasive vascular laboratory examinations within the scope of practice of the Registered Vascular Technologist (RVT) and in accordance with IAC Vascular Testing standards, including peripheral arterial duplex studies, cerebrovascular (carotid) duplex examinations, abdominal

aorta and aortoiliac evaluations (including AAA screening and surveillance), and other noninvasive peripheral and visceral vascular diagnostic studies as clinically indicated.

In addition, this role may include performing general ultrasound examinations as needed to support the practice, including but not limited to thyroid, abdominal, soft tissue, and non-vascular mass imaging, as well as assisting with ultrasound-guided procedures.

KEY RESPONSIBILITIES:

- Review medical records and obtain relevant patient history
- Perform duplex and Doppler ultrasound examinations per laboratory protocols
- Conduct venous insufficiency studies and deep venous testing, including iliac and pelvic evaluations
- Perform noninvasive arterial studies, carotid duplex examinations, and abdominal aorta / aortoiliac (AAA) evaluations
- Perform general ultrasound studies as needed, including thyroid, abdominal, soft tissue, and non-vascular mass imaging
- Assist providers with ultrasound-guided procedures, including fine needle aspiration (FNA) when applicable
- Document examination findings and provide complete report data for physician interpretation
- Utilize the electronic medical record (EMR) appropriately and communicate significant findings
- Maintain ultrasound equipment and adhere to safety, infection control, and clinic policies
- Support a collaborative clinical team environment

Graduate of an approved discipline specific program (or equivalent experience) and 1 year relevant experience

Licensure, Certification, and/or Registration (LCR):

- Registered Vascular Technologist/Sonographer (RVT/RVS) Required
- Registered Phlebology Sonographer (RPhS) - Preferred

Job Type: Part-Time/ Full-time

Benefits:

- 401(k)
- Dental insurance
- Health insurance
- Life insurance
- Paid time off
- Vision insurance

License/Certification:

- Vascular Technologist Registration

Ability to Commute or Relocate:

- Lagrange, GA

Work Location: In person
